Construction

Architect:
David James Architects

Value:
£1.9m

Duration:
48 weeks

Completion:
Oct '11

The project in Brudenell Avenue consists of two stunning contemporary homes in this exclusive neighbourhood in Poole. The design is particularly bold with the two plots having curved glazed facades either side of a straight gap between dividing walls. This helps maximise the incredible views available across Poole Harbour, taking in Brownsea Island, Poole Harbour and the Purbecks in the distance.

Construction is almost as bold with the use of the Integrated Concrete Formwork system to provide excellent insulation and structural integrity.

Both plots offer 3 en-suite bedrooms, sunken gardens, guest suites with dressing rooms and terraces to take advantage of those amazing views. One plot has basement car garage, the other semi-basement garaging.
