

Southampton Solent University

Project data

Client:
Southampton Solent University

QS/PM:
Davids Langdon

Architect:
Simpson Hilder Associates

Value:
£472k

Duration:
11 weeks

Completion:
Aug '09

One of the challenging factors of this extensive remodelling contract was completing within a short time frame before the start of the new academic year whilst working around summer students. There were 4 different locations requiring full strip out and refurbishment including 2 sports science areas, the Milais Gallery and a reception area at the front of the site. An external building was also installed to contain a disabled lift for access to the new basement area. Out of hours and weekend work was required to manage the project around the students and accommodation areas, with constant consideration of permit, health and safety protocol and large amounts of people control.

Th project proved significantly demanding in working and coordinating with other contractors right across the site. We successfully completed this contract on time and with minimal disturbance to the ongoing summer courses.
