Harrington Design

Value:
£1,601k

Duration:
30 weeks

Completion:
Jun '07

Teknoflex was the redevelopment of a site in this popular industrial and commercial area of Chichester. It was particularly pressured for Amiri as the clients office overlooked the site!

The project comprised the design & construction of a metal clad, steel framed

building providing a production facility with two storey offices, reception and common areas to the front. Whilst the building was straightforward there was significant ground improvement carried out due to the former uses of this site.
