

Tenchley Manor Care Home, Selsey

Project data

Client:
Cheerhealth
QS/PM:
Davis Langdon
Architect:
PWP Architects
Value:
£330k
Duration:
20 weeks
Completion:
Feb '10

Our second project for this client, negotiated after the award of our first, the competitively tendered Hulbert Road project in Bedhampton, sees us providing 6 new bedrooms in a remodelled and refurbished home. The incorporation of these has been enabled by the provision of a first floor timber-framed extension. All works were carried out whilst the home remained occupied and with limited access.

With all the activity inside the care home itself and with the location on an exposed peninsula and in a residential area a great deal of consideration was given to the weather and with regard to not disrupting the day-to-day routine of the residents, staff and neighbours during the course of construction.
