RLF

**Engineer:**  
Archibald Shaw

**Architect:**  
HNW Architects

**Value:**  
£800k

**Duration:**  
16 weeks

**Completion:**  
Sept '08

This was Amiri Construction's fourth project for the University and it's most rewarding. The project saw us carry out a new DDA works, incorporate a new lift, and provision of new lecture theatre, including seating. The lift was the most complicated element due to the split floor levels.

This was a difficult programme of works in such a short space of time. Completion on time was essential prior to the return of the students and liaison with the University was of paramount importance.
