

Voyager Park, Phase I

Project data

Client:
Slough Estates International

QS/:
Davis Langdon LLP

Architect:
HNW

Value:
£195k

Duration:
6 weeks

Completion:
kshlksfhlskhf

Amiri Construction are delighted to have worked with national developer SEGRO (formerly Slough Estates) to help them achieve their goal of offering the most flexible industrial space that they can.

Using our off-site manufactured toilet pods, constructed to a specification carefully developed by SEGRO, their design partners, Amiri Construction and our supply chain, SEGRO were able to offer an almost infinite range of business space at Voyager Park. Once terms had been agreed with a tenant all that was required was for the party walls to be built in the right place and the requisite number and type of pods to be incorporated.

This was achieved quickly, efficiently and the pods offered a significantly higher quality than anything built in a traditional manner.

Entrance canopy construction was also included in the Phase 1 works at Voyager Park.

The success of this strategy has meant that we have carried out further work on the same basis at Voyager Park and other SEGRO sites.
